### Stock Market Grain Review

Quotations became more uneven on the recovery, some specialties going thigher, while representative shares lost some of their gains. Bethlehem Steel was again prominent for its further that virtually no grain had been bought to arrive on over nights bids to the country, and that consignment notices advance to 335, and later General Mo-tors, by its rise of 5 points to 268, also established a new record. Crucible established a new record. Crucible Steel, which led the list as the most active stock in the first hour, repeated its high price of yesterday, gaining % at 314. Trading became dull and of a mixed character towards need to stock to 95c. and Downth September at 15 t industrials as tobacco issues, Express shares and American Woolen coming forward at variable advances. Bonds were irregualr.

Contrary to general expectations and despite the weakness of Americans in London, latest complications in the international situation failed to exert much influence at today's opening. There were initial declines of a point or more in railways and specialties, but the movement underwent speedy rever-sal with general recoveries on the first fifteen minutes. Reading advanced a substantial fraction over yesterday's close to 151¼ and Eries were in special demand with material gains. Bethle-hem Steel, which opened down a point at 324, rose immediately to 329, passing its previous best by four points. United States Steel also responded to the improving tendency.

Gains were replaced by losses in the final hour, Steel falling to 74%. The closing was heavy.
